SPORTFIVE

EMERALD AI x ASTON MARTIN F1 BRIEF

29 October 2026

Key account: Emerald AI

Investor: Aramco is an investor in Emerald AI.

Industry: Flexible power for AI data centres.

What they do: Emerald AI helps AI data centres operate as flexible, grid-responsive loads. Its platform coordinates power demand with grid conditions while protecting the performance of AI workloads. The commercial story is not simply energy efficiency: it is faster, more scalable AI infrastructure deployment by making data-centre demand more compatible with the power system.

Target customers: CEOs and CTOs at hyperscalers, neoclouds, data-centre developers/operators and utilities.

Key markets: Near term: UK, Japan and USA. Longer term: Singapore and Korea (high), Saudi Arabia and UAE (medium-high), Germany and France (low).

F1 objective: Executive access. Repeated face-to-face time with relevant partners and other invited executives is the primary F1 value driver. Brand exposure is secondary to building qualified CEO/CTO relationships, pipeline and signed MOUs.

Marketing rights (must have):

- Race hospitality for priority clients and prospects
- CEO forums and co-sponsor introductions
- Technology collaboration and case studies
- Driver, team principal and senior-team access where it supports executive engagement

Of particular interest: The “AMR Network” and the inaugural Technology Forum held at the newly constructed AMR Technology Campus (AMRTC) in Silverstone, UK.
